Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

The declaration was not signed and dated.

Specification

2. The disclosure is objected to because of the following informalities: in paragraph 49, lines 5 and 6, it appears that bolts "37" and "39" should be "36a" and "36b".

Appropriate correction is required.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-6 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Madden as taught by Thompson.

Madden shows a cover 18 attached to the pre-existing frame of a dispenser; first side wall 26; front wall 28; second side wall opposite from first side wall 26 and substantially parallel to it as seen in Figure 2; angled wall between 26 and 28 seen in Figure 2; end wall 19; tab 25; slot as the open portion beneath edge of 28; and tab 25 is connected to 26 opposite end wall 19 as seen in Figure 2 as the tab projects and is

connected outwardly of wall 19. Madden lacks the structure protecting and surrounding a pulser and the relative dimensions of the walls. Thompson teaches protecting parts of the interior of a fuel dispenser from tampering as noted in column 1, lines 58-65. It would have been obvious to one of ordinary skill in the art to employ a protective cover of Madden on an internal component of the dispenser, i.e. the pulser, as taught by Thompson in order to prevent tampering and/or destruction of the device. Note, the relative dimensions of the walls to each other would have been obvious dependent on the size and shape of the protected part(s).

Allowable Subject Matter

5. Claims 7 and 9-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mattimoe et al., Robbins, Mahar and Nelson et al. show other fuel dispensers.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph A. Kaufman whose telephone number is (571) 272-4928. The examiner can normally be reached on Monday-Thursday, 5:30AM-2PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Mar can be reached on (571) 272-4906. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
